## Peake Sand Driving Weekend 7-8 October 2006

A fantastic time was had by all club members who attended our first weekend event, a sand driving weekend on the dunes at Peake. Cuffs, our esteemed president, did a wonderful job organising the event which officially commenced when we all met at Taillem Bend to travel by convoy to the site.

Once camp had been set up and tyres let down, it was off to the sand dunes under the mighty instruction provided by Graham Hill of the Northern 4WD Club. Steve was also kind enough to give us an impromptu practical demonstration of fixing a tyre that had come off the bead.

In no time at all, we were achieving things with our vehicles that many thought impossible. Amongst the group were complete novices who were new to 4wd'ing, some with a little experience, and some with more. We all had several things in common though, we were all there to enjoy ourselves, enjoy the outdoors and we all knew we could learn something about driving in this terrain, the capabilities of our vehicles and ourselves as drivers, and we did all that!

In the evening, we shared a beautiful campfire with the Northern 4WD Club, span a few yarns and the kids had an absolute blast in the outdoors. So all in all, it was both an educational and enjoyable weekend with a fantastic bunch of people who are proud to be members of the High Range 4WD Club.
