MONARTO ZOO TRIP – May 2007

Sunday May 27th saw quite a number of the club members get together for a day trip to the Monarto Zoo via the Adelaide hills and some dirt back roads. Our trip leader Cuffs chose some good tracks and made a wrong turn, but in all a good trip. It's just a shame it had not rained so everybody's cars could have got a bit muddy instead of just dusty.

Once we reached Monarto, we had lunch then it was off to the visitors centre to board the bus for the trip round the zoo to see all the animals. It was great to see wild animals in the wild as such not in a cage like normal zoos.

The bus stopped several times to allow everybody the chance to get some good photos. Once back at the visitors centre everybody did there own thing for a while before gathering together to say goodbye to those who were going their own way home. Some of us followed Cuffs back on the dirt back roads till we got to Old Norton Summit Road then went our own way home. I think everyone enjoyed themselves; there were 11 cars in the convoy with 27 people out for the day trip. A good turn out.

Once again thank you Cuffs for organizing another good days outing. See you all at the next one.
